

SCOPE OF WORK

Learning Management System

Introduction:

The Learning Management System (LMS) portal is being developed to provide a centralized, user-friendly, and scalable platform for managing digital learning activities within the organization. The LMS will be a strong system that gives different features to administrators, teachers, and students based on their roles and needs.

SCOPE (Feature List):

1. Course Management

- Create, edit, and delete courses
- Organize courses into categories/modules
- Manage course schedules and availability

2. Content Upload

- Upload learning materials (PDF, Video, Audio)
- Preview uploaded content before publishing
- Organize content by modules/chapters
- Role based access

3. Assignments and Quizzes

- Create assignments with deadlines
- Design quizzes (MCQ, True/False, etc.)

4. Submission and Auto/Manual Grading

- Submission tracking (date, time etc.)
- Re-submission support (based on admin rules)
- Auto-grading for objective questions
- Manual grading for assignment

5. Reporting & Analytics Dashboard

- progress report
- course completion status
- login frequency

6. Notifications & Announcements

- real time alerts
- specific user announcement
- email sync

7. Role-Based Access Control

- admin – full system access & control
- Instructor/ teachers – create /manage course & view student data
- student – view course materials & submit work
- guest/visitor (optional) – read only

8. Secure Login & Authentication

- user login in with unique id (username/email) & strong password
- complex password rules (minimum 6 character and symbols)
